Version:	0.22	Language:	English (US)
Platform:	Win32	Mod Related:	No
Expansion:			

Description

When selecting Kerbal Space Program from the Start Menu in Windows 7 Home Premium, KSP Launcher is displayed. Pressing the Play button causes a User Account Control prompt to appear, requesting elevated privileges. Only by accepting this prompt can KSP be launched.

Double-clicking KSP.EXE in the install folder does not cause a prompt, and the game appears to function normally without any elevated privileges.
