#### Description

I left KSP in standby when I turned off my Xbox One X. Upon returning, I noticed that my Load SPH is blank. I have lost all of my saved planes and rovers. Also, saving new designs results in the same blank screen.

I did a console hard reset, and the problem persists. This is my second broken career save. Please, look at my other reported bug.

I am available if you need a paid QA tester.

#### History

##### #1 - 02/12/2018 04:02 PM - Samssonart

- Status changed from New to Being Worked On

- % Done changed from 0 to 30

##### #2 - 03/20/2018 11:40 AM - Squelch

- Severity changed from Critical to Normal
