Platform:	PS4	Mod Related:	No
Expansion:			

Description

Some controls that are available elsewhere (such as the PC version) do not seem to be available using the simplified control scheme on PS4:

- You can't manually change the camera (e.g. between what the PC version calls "auto," "chase," "orbital," etc).
- In the R&D building when you are looking at one of the parts a node unlocks and the "additional info" panel has a scroll-bar because of its length, there is no way to scroll down the additional info there.
- After focusing the Mun in map view I can't find a way to "unfocus" it and return focus to my own craft.

I think there are more, but I'll have to look in the game again.
