FWIW, in the PC version of KSP, I have noticed that in the enumeration VesselAutopilot.AutopilotMode, RadialIn and RadialOut seem to do the opposite of expected behavior when I try to set SAS mode through a plugin by calling vessel.Autopilot.SetMode(VesselAutopilot.AutopilotMode.RadialIn) (or RadialOut). I've had to work around the issue in my mods, but I'd suggest that that might be the issue.
