Description

So the explanation of the bug is when I go to my space station or base and I want to rename it to the space station logo and when I rename it I go to the tracking station to see it because it looks cool. But then the logo goes back to the ship logo and not the space station logo, that is the bug. So the video is on my twitter and here is the link to it.
https://twitter.com/JosephMurdoch0/status/962743879836618757 The step I take trying is to time warp, but it works sometimes, sometimes. And this bug is on Ksp enhanced edition.
