Description

Good evening,

I like the new changes, especially those to the MK1-3 command pod (centering the door, making it lighter, etc). I noticed, however, that the crew pictures (with IVA/EVA option) are missing from the lower-right corner.

Keep up the good work, just wanted to let you know,

Kyle

If you guys haven't figured out yet : the issue is from the INTERNAL node in Mk1-3.cfg. It looks like :

```
INTERNAL {  
name = Mk1-3  
}
```

But there is no internal of that name.

Changing it to :

```
INTERNAL {  
name = PodCockpit  
}
```

Brings back the internal from the legacy Mk1-2 pod. (and the flight portrait is working too).

- File Portrait and EVA tester.craft added

I concur this is new to version 1.4.0

All other pods, passenger containers, and science lab have tested fine with regard to this bug.

Attached ship file: "Portrait and EVA Tester"

Scientist starts out in the science lab. Transfer him around to each pod for test.
