

Kerbal Space Program - Bug #18067

MK-1-3 pod has bad other parts compatibility

03/15/2018 09:14 PM - Alexoff

Status:	Updated	Start date:	03/15/2018

Version:	1.4.1	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Core Game		

Description

New Mk13 pod is compatible only with several parts in game, for example parachute, 2.5 m heatshield or SAS. But other standart 1.25 and 2.5 m parts are not full compatible with this pod - places of interconnections look bad.

History

#1 - 03/16/2018 08:14 AM - Tomator

- Top of the part seems too narrow and part attachment point seems too high.
- The bottom is certainly designed to re-entry so the rounded edge is correct but causes flaws in look an aerodynamics (probably not taken into account in simulation). To fix it there should be a ring attached like when the heat shield is stacked with a decoupler.

#3 - 06/24/2019 12:33 PM - Robert.Keech

- Status changed from New to Updated

- % Done changed from 0 to 10

Issue still occurs
