

Kerbal Space Program - Bug #18802

Editing text with hidden escape sequences causes cursor to not line up with location of text being changed

05/04/2018 11:45 AM - jclovis3

Status:	New	Start date:	05/04/2018
Severity:	Low	% Done:	0%
Assignee:			
Category:	Controls and UI		
Target version:			
Version:	1.4.3	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Making History		
Description			
<p>Problem: Typing the \n sequence in text blocks such as dialog and message nodes causes the '\n' to disappear making editing difficult. Trying to backspace, delete or insert text near these hidden characters causes unwanted problems as the cursor does not line up with where the editing is taking place. Please watch the video to see what I'm talking about.</p>

<p>Related: Bug #18787 - tells us not to use the Enter key to create new lines in text but to use the '\n' sequence instead.</p>
