

Kerbal Space Program - Bug #18995

Mission difficulty cheats disabled allows cheats

05/20/2018 07:21 PM - jclovis3

Platform:	Windows	Mod Related:	No
Expansion:	Making History		

Description

When creating a mission, and setting the difficulty setting to disallow cheats, it seems that you can still go into a Sandbox game, set the cheats you want (like unlimited fuel), and then go back into the mission that is supposed to prevent cheats and it will still be in effect.

I discovered this while testing another bug in Sandbox and coming back to the mission I was working on. From within the mission, I couldn't go back in and turn the cheats off because the menu option was gone.

Expected result:

When cheats are disabled, all cheat configurations should be reset back to default settings.

The reset to default settings should apply not just when the mission starts, but any time you continue it as well.
