Please, always provide a description of the issue - it seems evident to you, but who should examine it would like to know how it could be reproduced. In case, if you changed language(s); if you verified to have files downloaded correctly, and what was actually loaded at game start. At a very minimum, provide:

- savegame and steps to show the situation;
- output_log.txt;
- ksp.log

Also, I'd guess one or both these files may show something unusual: /GameData/Squad/Localization/dictionary.cfg; /GameData/Squad/Agencies/Agents.cfg; however developers may ask for other ones.
