Description

I only encountered/tested this in VAB.

While building "OSS Kerbin 1", i wanted to merge a prepared "Hammer", connected them via dockingport on 4 sides to "OSS Kerbin 1". I wasn't satisfied with alignment of "Hammer" on decoupler. Change wasn't mirrored and produced error.

I think the picture is showing better than i can explain i think.

Just found out, when undoing this change, you can retry and it's working then (as well when saving and loading).
