

Kerbal Space Program - Bug #19931

Can't resume flight - [FlowGraph] error

08/31/2018 03:03 AM - Puhac

Status:	New	Start date:	08/31/2018
Severity:	Low	% Done:	0%
Assignee:			
Category:	Gameplay		
Target version:			
Version:	1.4.5	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Core Game		

Description

Crazy thing - I cannot access my flight anymore. I ended up creating a craft and used the 'cheat' section of the debugger to teleport to my Mun orbit craft. I found errors once it teleported and my ship was broken apart in all single pieces. (floating in space).

Errors:

[FlowGraph]: Graph already contains item! Part Mark1Cockpit (MoonRunner2 w/ Sats) with id 4294349068
Can't remove Rigidbody because KSPWheelController(Script) depends on it

History

#1 - 08/31/2018 11:33 PM - Puhac

- File MoonRunner2 w_ sats 1.craft added

It appears it is an issue with my craft. The game warns me that it cannot find the root part. Here is the craft file.
