

Kerbal Space Program - Bug #19973

Opening the basic game without MH and too low of a resolution makes it impossible to play the game

Description

Reported here: <https://forum.kerbalspaceprogram.com/index.php?/topic/178025-help-unable-to-play-the-game-at-all/>

Every time I try to launch kerbal space program I can't select anything on the main menu because the make history expansion window is oversized and blocking everything. I can't move around the window nor are the buttons to close it on the screen. I don't want to have to buy the expansion just to play the game. Thanks

History

#2 - 10/15/2018 04:44 PM - joshua.collins

- Status changed from New to Ready to Test
- Target version set to 1.5.0
- % Done changed from 0 to 80

Please check this in 1.5.0

The lower scale UI should no longer obstruct closing overlay windows at startup.

#3 - 10/23/2018 06:41 PM - Steven.Verssen

- Status changed from Ready to Test to Resolved
- % Done changed from 80 to 100

This issue no longer occurs on build 1.5.1.2335. The UI scale settings will be 120% at the beginning of the game. Pop up menu close options can be accessed by the user.

#4 - 10/25/2018 02:56 PM - joshua.collins

- Status changed from Resolved to Closed
