

Kerbal Space Program - Bug #20064

autoLOC for all words

09/21/2018 08:37 AM - DanielRR05

Status:	Closed	Start date:	09/21/2018
Severity:	Low	% Done:	100%
Assignee:			
Category:	Steam		
Target version:			
Version:	1.4.5	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Core Game, Making History		

Description

This bug shows all words (part stats, settings, main menu, ect) with autoLOC. I have tried uninstalling the game twice, validated the game multiple times and it still shows autoLOC. i managed to work my way through the de-bug menu and when i launch KSP, it say failed to Initialise Steam API. I do not know what this means and have tried and failed to find a solution tot this problem. I have put the KSP Log in the box below. Thanks

The Steam API will not be initialised when you start the game via the KSP_x64.exe and not through the steam library but this will not cause your issue. Without the steam API, you are not able to use the steam overlay and proably the workshop integration, nothing else. This issue sounds more like your localization dictionary is broken, try to delete these two files:

- C:\Program Files (x86)\Steam\steamapps\common\Kerbal Space Program\GameData\Squad\Localization\dictionary.cfg
- C:\Program Files (x86)\Steam\steamapps\common\Kerbal Space Program\GameData\SquadExpansion\MakingHistory\Localization\dictionary.cfg

Than, verify your gamedata integrity through steam (right click on the game in your steam library -> properties -> local files), this will cause steam to download the deleted files again and hopefully fixes your issue.

If verifying the files through Steam does not solve the issue, you might want to check your settings. There's a setting in the debug menu that will make the UI show only the autoLOC codes instead of the localized text. Maybe in trying out things you accidentally selected that option?

The easiest way to check and solve this would be by opening the 'settings.cfg' file in the main KSP directory in Notepad, and look for this entry:

```
SHOW_TRANSLATION_KEYS_ON_SCREEN = True
```

If that says 'True', you need to change it to 'False'. Then save and restart the game.
