<b>Description</b>			
Hi there,			
After a successful flight, I recovered the vessel and got back to the space center. I then entered the research building and most controls suddenly stopped working.			
I am ABLE to:			
- zoom in and zoom out (using L2/R2) in the technology tab			
- switch between technology and science archives tabs (using L1/R1)			
I am UNABLE to:			
- navigate in both tabs			
- return to space center ("O" is unresponsive)			
- open the pause menu ("Options" is unresponsive)			
- and so on			
I am basically stuck in the building, and all I can do now is quit the game. Hopefully my last flight won't be lost.			
I really like this game, but after only about a month, I see a trend towards more and more frequent bugs (I previously had issues with unresponsive controls in flight and in the VAB, too).			
Hope this helps.

Could this possibly be related to the "More Options" lock up bug?
