

Kerbal Space Program - Bug #20230

Parts disappear when rearranging them from one stage to another. Stage list disappears if you scroll up.

Description

Hello,

Today (the 15th of oct.) I updated KSP to 1.5. I've been having fun except for 1 problem. The staging doesn't work properly. When I move parts inside the stages around from 1 to another the part disappears. When I scroll down on my mouse on top of the staging the whole staging list goes up and out of sight. I have included links to 2 different highlights of the incidents and provided a link to the entire thing so you can see it for yourself.

Full stream: <https://www.twitch.tv/videos/323076565> 2:30:25 is the best example of the problem

Highlight 1: <https://clips.twitch.tv/TallBigFungusKappa>

History

#1 - 10/18/2018 12:29 AM - TheAngryHulk

- Subject changed from VAB/SPH Staging Bug to Parts disappear when rearranging them from one stage to another. Stage list disappears if you scroll up.

#2 - 10/24/2018 04:48 PM - Steven.Verssen

Update:

This issue no longer occurs on build 1.5. The user is able to delete an empty stage if it is located in between two stages. If stage zero is empty the stage will disappear without clicking the minus.
