#### Description

Steam 1.6.0 MH 1.6.0

#### Description:

When in orbit around certain Planets/moons deltav displays as NaNm/s as per screenshot

I have indicated as follows which display as they should and which dont.

Bad: The Mun Minmus Moho Ike Vall Bop Tylo Gilly Pol Dres Eeloo

Good: The Sun Eve Duna Jool Laythe

Following save files are attached:

'NaNm\_s Staging Bug.sfs' is from the screenshot but note that most of the testing was done using setting orbit, so the next save is of a rocket that was launched conventionally

'On Encounter with The Mun.sfs' is from a rocket that I launched correctly from Kerbin, it displays correctly until it changes to the Mun encounter (within 10 seconds of the save loading) from the Kerbin SOI where NaNm/s then displays

Got a save where this happened to me. It seemed to only do it after entering Minmus' Sol, but before actually using an engine.
