

Kerbal Space Program - Bug #20843

KSP crash immediately after extending radiator

01/05/2019 06:23 AM - EthanWang706

Status:	Closed	Start date:	01/05/2019
Severity:	Low	% Done:	100%
Assignee:	Robert.Keech		
Category:	Parts		
Target version:			
Version:	1.5.1	Language:	简体中文 (Chinese Simplified)
Platform:	OSX	Mod Related:	No
Expansion:	Core Game, Making History		

Description

I currently don't know whether this is because of mods or not. crash log uploaded, there were no other information except this mod list. This issue only occurs in KSP 1.5.1

MOD list:

KAS

KIS

KS3P

LoadingScreenManager

LunaMultiplayer (not used)

ModularFlightIntegrator

ModuleManager.3.1.0

NearFutureElectrical

PatchManager

ReentryParticleEffect

scatterer

TextureReplacerReplaced

I will write the result after removing all mods once I finish testing
