

Kerbal Space Program - Bug #20887

Sorted column does not carry over in R&D Archives

Description

After sorting by a column in R&D Archives, and then selecting a different experiment or situation, the v or ^ icon remains on the sorted column, but the new filter sorts by the default column.

I expect sorting to remain as I have set it, or at least put the v/^ icon back on the original column.

STEPS TO REPRODUCE:

- 1) Have some science, from at least 2 biomes or experiments. The more the better, as just 2 may coincidentally sort.
- 2) Go into R&D, Archives.
- 3) Click a category that has at least 2 entries (more is better).
- 4) Sort by "Science" so they are in numerical order.
- 5) Click another category that has at least 2 entries (more is better).
- 6) Note the v/^ icon is still on "Science" though the list is sorted by Experiment Name (the default)
