

Kerbal Space Program - Bug #20930

Terrier collider does not change with variants

01/14/2019 12:30 AM - Anonymous

Status:	Confirmed	Start date:	01/14/2019
Severity:	Low	% Done:	10%
Assignee:			
Category:	Parts		
Target version:			
Version:	1.6.1	Language:	English (US)
Platform:	Linux, Windows	Mod Related:	No
Expansion:	Core Game		

Description

The new 'bare' variant of the Terrier looks like it fits a 0.625-meter mount, but that variant acts like it has a collider the same size as that of the torus-shaped thing at its top in the 'shroud' variant.

The Spark and other engines with variants from Making History seem to have colliders roughly matching their visible shape.
