### Description

Problem: The radial attachment of the FL-T100 fuel tank does not match the other 1.25m tanks, and results in part clipping. This seems to be an issue going back as far as 5 years, these are closed:

<https://bugs.kerbalspaceprogram.com/issues/1839>

<https://bugs.kerbalspaceprogram.com/issues/7909>

The problem still lies in the part .cfg (fuelTankT100.cfg)

This file has the line:

```
node_attach = 0.5, 0.0, 0.0, 1.0, 0.0, 0.0
```

All other size1 tanks have this line instead as:

```
node_attach = 0.625, 0.0, 0.0, 1.0, 0.0, 0.0
```

Changing this one value in the .cfg file fixes the issue for the FL-T100.
