Description

I seem to get stuck in app selection mode a lot. This happens when I have the resources app pinned, as I often do. So I'm just minding my burns when I decide to have a look at contracts or something else. I use triangle=>apps and check out the contracts. Then when I try to leave the apps with O I sometimes I can't get out anymore. If I go to cursor mode with R3 and back I'm still stuck. L1+R1 to map works, but still stuck. "options" go to space center or tracking station I get unstuck.
