Description

My version of ksp (Xbox One) has this glitch that doesn't allow me turn my engines on after warping, by the way I bought my copy near Christmas.

History

After Warping I can't turn my engines on. This is all the information I have.

- .All engines have this glitch
- .It doesn't work on RCS
- .The glitch only happens when I am in space
- .I bought my copy of Kerbal Space Program during the few weeks before Christmas of 2018
- .I haven't bought the making history DLC
- .Once the glitch is activated it can not be fixed
