

Kerbal Space Program - Bug #22286

'Resource transfer obeys crossfeed rules' setting does not honor fuel ducts (pipes)

Expansion:	Breaking Ground, Core Game, Making History		

Description

As you can see in the attached image, there is an Mk1 liquid fuel tank attached to an Mk3 liquid fuel tank with an I-beam in between and also fuel pipe going from the Mk3 tank to the Mk1 tank. This setup allows the engine mounted on the Mk1 tank to draw fuel from the Mk3 tank, but does not allow fuel transfer to the Mk1 tank.

Since fuel pipes do mediate fuel delivery when the engine is burning, the same should be possible - at least in the direction indicated on the pipe - with fuel transfer.

History

#1 - 05/15/2019 05:16 PM - Kasuha

Note: there are 'Out' and 'In' buttons on the Mk1 tank but they don't do anything. They're also missing on the Mk3 tank.
