Are you using Steam? If so, just redownload the game, that fixed it for me. Or you can delete the localization file from GameData/Squad/Localization and validate game files through Steam.

i have the same problem. the localisation is completely missing from the 'dictionary.cfg' there is also another missing one - #autoLOC\_8003261 - in the action groups menu. Bear in mind i don't have any of the DLC and it's fine in 1.7.0 but not in 1.7.1.

It must be something to do with the new DLC options

I have tried verifying the game cache several times and reinstalling KSP completely but nothing has worked. TBH it's not the end of the world. i can probably find out what it's supposed to be from the internet and manually alter the .cfg.

Just came across someone in the forum who had the same issue. Apparently, these two strings are in the wrong dictionary, they are in the Serenity dictionary instead of stock: <https://forum.kerbalspaceprogram.com/index.php?/topic/184943-action-groups-showing-autoloc/>  
Since these strings appear to be part of the 1.7.1 update and not of the Breaking Grounds DLC, they should be moved to the stock dictionary.

For a temporary fix, take a look into the linked forum post :)

- Has duplicate Bug #22731: #autoLOC\_8003261 added

#### #5 - 06/13/2019 05:03 PM - nestor

- Status changed from Confirmed to Ready to Test

- Target version set to 1.7.2

- % Done changed from 10 to 80

**#6 - 06/29/2019 10:44 PM - Anonymous**

- Status changed from Ready to Test to Not Fixed
- % Done changed from 80 to 50
- Language 简体中文 (Chinese Simplified) added

In 1.7.2.2556, the main-menu settings is fully in English, but the VAB/SPH still shows #autoLOC8003261 (in the base game without Squad add-ons) Also, the new 'Debug' sub-heading for right-click menus is #autoLOC\_8320010 in the English-version base game

**#7 - 07/01/2019 05:33 AM - Anonymous**

- Language deleted (简体中文 (Chinese Simplified))

**#8 - 07/16/2019 07:00 PM - chris.fulton**

Several Changes and bug fixes have been made, moving this bug to RTT and can you check it in 1.7.3.2594?

**#9 - 07/16/2019 07:01 PM - chris.fulton**

- Status changed from Not Fixed to Ready to Test
- % Done changed from 50 to 80

**#10 - 08/19/2019 05:35 AM - Anonymous**

- Subject changed from Setting options strings displaying as #autoloc to Menu strings displaying as #autoloc

No change since 1.7.2  
KSP without the BreakingGround mod is still showing the old #autoLOC\_8320010 and #autoLOC\_8003261  
There are new strings "Axis groups" and "Default" in the new localization.cfg, but they have different #autoLOC\_601nnnn tags.

**#11 - 08/19/2019 05:36 AM - Anonymous**

- Status changed from Ready to Test to Not Fixed
- % Done changed from 80 to 50

**#12 - 12/08/2019 07:31 AM - Anonymous**

- Status changed from Not Fixed to Resolved
- % Done changed from 50 to 100

The two autoLOC\_ strings in the top of this report are now translated, with only the base game installed.

There is still autoLOC\_8320010 in the right click menus (part action window) but that is a different bug.

**#13 - 01/24/2020 12:47 AM - chris.fulton**

- Status changed from Resolved to Closed
