Description

Issue:
I go to the tracking station and I cant see anything just the starmap.

Attached:
Log File from the point I had the problem and then quit to the login screen and then quit to desktop.

Note:
Pretty sure I have seen this happen before 1.7.1. Not sure it happened to me or some twitch streamer

KSP 1.8.1 + MH + BG

Sorry, the player log file is over 5mb and the ksp.log is over 5mb so I had to put them into a zip file

Same issue (in the KSC screen) except this time I launched a rocket from the icons on the left of the screen, the scene loaded without textures just before a Unity Crash which I cant find the file for.
