Description

Hi there,

I have a station around Duna with quite a few ships docked to it, however im unable to undock alot of the ships. The 'Undock' button on the docking port on the station (not the ship like normal). I have managed to shave down my save file this time to upload by binning off some flights (RIP Kerbals).

I have attached the persistence file and a screenshot, for further details please load quicksave 35 and load the flight PNF Duna Orbital Station and try to undock some of the ships of the side of the station (The one with the hitchhiker module can undock, the others cannot) as the station is made from multiple other craft files I have not provided them, (but can be sent if needed).

Is there any way to fix this in game?

PS Love the game! keep up the good work!

Could you please update this issue after KSP 1.7.3 is out? Looking forward to hearing about your experience with that version, I'm expecting improvements.

Hi diomedea,

I have just downloaded the new update (1.7.3 i think) and i can confirm that the docking bug (in my save at least) has been fixed (even the ones in flight!!!!)

Thankyou Very Much and i hope you all have a great weekend!!!
