

Kerbal Space Program - Bug #23269

Surface Science is spamming my messages menu like crazy

07/28/2019 11:53 PM - Tekaoh

Status: Duplicate	Start date: 07/28/2019
Severity: Low	% Done: 100%
Assignee:	
Category: Application	
Target version:	
Version: 1.7.3	Language: English (US)
Platform: OSX, Windows	Mod Related: No
Expansion: Breaking Ground	
Description	
<p>I recently deployed my first ground science station on Eeloo. Everything was running fine until I decoupled some fuel tanks after takeoff and let them smash back into the ground. Now, I'm getting spammed by this message approximately twice every second:</p> <p>[DeployedScienceExperiment]: Surface Deployed Seismic Sensor from Eeloo's surface generated 361.3 science. Sensor Readings affected by Impact Energy: NaN% Distance Attenuation: 100% Setup: 100% 361.261 Science Points stored. No connection for transmission.</p> <p>Seriously, hundreds and hundreds of messages until I turn off the game. When I reload, it starts again after a few moments. I finally just terminated my ground station.</p>

Someone else with what appears to be the same issue:

<https://forum.kerbalspaceprogram.com/index.php?topic/186772-spammed-messages-from-deployed-science/>

#2 - 08/03/2019 01:37 PM - coredumpster

- Platform OSX added

I am seeing a similar error, but it's spamming incredibly small bits of science.

"Surface Deployed Mystery Goo Observations transmitted 0.003 Science points back to Kerbin".

Yes it was deployed by a scientist (level 1, so shows 35% science on the experiment). The issue is the messages appear every minute. Someone missed a decimal point somewhere in the frequency code for deployed science.

Seeing this only in 1.7.3, did not see it in 1.7.1 / 1.7.2.

There are (at least) two other related bug reports, [#23172](#) about high message rate in general (that includes two potential workarounds, one to turn off deployed science temporarily and one that alters ScienceTimeDelay in persistant.cfg and DeployedScience.cfg) and [#22757](#) about messages increasing when power is lost.

Also, someone in the forums found a way to clear up excessive messages by temporarily turning off Advanced Message Application in the settings: <https://forum.kerbalspaceprogram.com/index.php?topic/185093-screen-message-spam-in-breaking-ground/>

I'm not sure if leaving Advanced Message Application off would help reduce the messages or not.

I think we can assume that they are working on this and will release a new version when it is (hopefully) fully fixed.
