

Kerbal Space Program - Bug #23284

Crashes at low speeds between wheels causes illogical speed up of parts

07/30/2019 07:47 PM - maxisalamone@gmail.com

Status:	Need More Info	Start date:	07/30/2019
Severity:	Low	% Done:	0%
Assignee:	victorr		
Category:	Physics		
Target version:			
Version:	1.7.3	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Breaking Ground, Core Game, Making History		

Description

This happens at low gravity environments (like in my case). I crashed 2 vehicles wheel to wheel (7 tons, 21 tons) at 1.5 m/s, which caused one of them to jump up nearly 200 mts. This effect was seen at least twice.

Thank you for this report.

Could you please let us know if you were running any mod at the time?

Also, it would be great if you could provide a save file/folder so we can see the ships. Thanks.
