

Kerbal Space Program - Bug #23516

Dessert Launchpad and Airfield doesn't have mass limit check

09/05/2019 12:20 AM - flart

Status:	Closed	Start date:	09/05/2019

Version:	1.7.3	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Core Game, Making History		

Description

The Dessert Launchpad and Airfield doesn't have the mass limit check, while the Woomerang LaunchSite and Island Airfield (and obviously The Launchpad, and The Runway) have the checks.

Launching a 181t vessel with Level2_LaunchPad (Max. 140t) on all 3 launchsites log checks:

```
// the Launchpad
[LOG 02:22:27.549] [Pre-Flight Check]: Checking for CraftWithinPartCountLimit: PASS!
[LOG 02:22:27.555] [Pre-Flight Check]: Checking for CraftWithinSizeLimits: PASS!
[LOG 02:22:27.565] [Pre-Flight Check]: Checking for CraftWithinMassLimits: FAIL!
[LOG 02:22:31.619] [Pre-Flight Check]: Launch Aborted.

// Woomerang
[LOG 02:22:45.995] [Pre-Flight Check]: Checking for CraftWithinPartCountLimit: PASS!
[LOG 02:22:45.997] [Pre-Flight Check]: Checking for CraftWithinSizeLimits: PASS!
[LOG 02:22:46.002] [Pre-Flight Check]: Checking for CraftWithinMassLimits: FAIL!
[LOG 02:22:48.766] [Pre-Flight Check]: Launch Aborted.

// Dessert
[LOG 02:24:54.956] [Pre-Flight Check]: Checking for CraftWithinPartCountLimit: PASS!
[LOG 02:24:54.957] [Pre-Flight Check]: Checking for ExperimentalPartsAvailable: PASS!
[LOG 02:24:54.959] [Pre-Flight Check]: Checking for CanAffordLaunchTest: PASS!
[LOG 02:24:54.961] [Pre-Flight Check]: Checking for NoControlSources: PASS!
[LOG 02:24:54.964] [Pre-Flight Check]: Checking for LaunchSiteClear: PASS!
[LOG 02:24:54.967] [Pre-Flight Check]: All Checks Complete. Go for Launch!
```

Since a player upgrades only the Launchpad and the Runways, it is make sense that increasing limitation doesn't propagate to other unchangeable launchsites and airfields.

On the other hand, in the VAB/SPH we see these mass limitation in the craft engineering log, and nothing tell us, that the mass is limited only for the Launchpad and not for other launchsites.

- So:
- Easy fix:** make all checks the same (enable mass check on dessert objects);
 - Complex fix:** leave mass check only for the Launchpad and the Runway, and make changes to the GUI for telling user about unlimited mass for other launchsites.
 - Hard fix:** make all runways and launchsites independently upgradable (add their icons to the main KerbalSpaceCenter window, new models per level, and so on)

History

- % Done changed from 0 to 10

#4 - 10/17/2019 07:43 PM - victorr

- *Status changed from Confirmed to Ready to Test*
- *Target version set to 1.8.0*
- *% Done changed from 10 to 80*

We've made some changes in the latest version and would like some feedback on this issue. Thanks.

#5 - 10/20/2019 10:07 PM - flart

Desserts have the same checks as others, but name of the specific launchsite (ex. Dessert Airfield) isn't showed in the message <https://i.imgur.com/2HfjKxu.png>.
instead used Launchpad/Runway for all launchsites.
