Version:	1.8.0	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Breaking Ground, Core Game, Making History		

Description

Hi all,

Another bug was filed and closed for this by another user, but I believe I am still experiencing the bug. There seems to be a lot of confusion in this mission that obfuscates the actual bug, but I believe I've isolated it. For my particular mission, I am to use the TD-25 Decoupler in Orbit around Kerbin between 360,000m to 370,000m, via staging. I have tried this with two rocket designs, and have repeatedly verified that I am doing it correctly. I have tried to activate the decoupler during both staging, and right-click-activating with all green conditions met. Despite all attempts, the contract is never fulfilled. I have provided a video illustrating an example of it not succeeding.

I am left to believe that this is either a bug, or I need to use the correct part sizes to accomplish the mission. I am less inclined to believe the latter, due to being able to accomplish all other contracts successfully without needing an appropriate-looking staging setup. Another possibility is that my program itself is corrupt, in which case I will also run Steam's integrity-check and re-evaluate for the bug.

Can you attach a copy of your saved game, please?

#2 - 10/26/2019 08:16 PM - wbolter

- File Break.zip added

Adding associated saved game.

#3 - 10/28/2019 06:17 PM - just_jim

- Status changed from New to Confirmed

- Assignee set to just_jim

- % Done changed from 0 to 10

Yes, there is something strange going on. I'm seeing the same issue.

As a work around you can use alt F/12 to complete the contract without taking a penalty.

#4 - 10/28/2019 06:17 PM - just_jim

- Project changed from Kerbal Space Program to KSP Release

- Category changed from Bug Tracker to Bug Tracker

- Resolve when Fixed On set to Single Reported Platform

- Language deleted (English (US))

#5 - 10/28/2019 06:43 PM - just_jim

- *Project changed from KSP Release to Kerbal Space Program*
- *Category changed from Bug Tracker to Bug Tracker*
- *Resolve when Fixed On deleted (Single Reported Platform)*
- *Language English (US) added*
