Kerbal Space Program - Bug #24534

Unplayable Screen bug

12/27/2019 04:28 PM - lcgswolf

Status:	New		**Start date:**	12/27/2019
Severity:	Low		**% Done:**	0%
Assignee:				
Category:	Application			
Target version:				
Version:	1.8.1		**Language:**	English (US)
Platform:	OSX		**Mod Related:**	No
Expansion:	Breaking Ground, Core Game, Making History			

Description

When I start the game the screen appears like this, I try to take an screenshot but the screenshot appear as normal, I had to take a picture with my phone to get the issue.
Also when I take the screenshot on Mac, the game looks normal for a moment while I go back to the game, once I select anything on the game the screen distorts again.

Please help me with this, I don't have too much time available to play KSP and now that I'm on vacations I cannot play it!!!!

History

#1 - 12/29/2019 04:43 PM - lcgswolf

UPDATE: It must be related with Full Screen, If I deactivate full screen mode and reactivate it the problem is fixed during that session, If I restart KSP I have to do that again
