

Kerbal Space Program - Bug #24820

buttons on axis in Graphical Maneuver editor grow when clicking

02/10/2020 10:28 AM - jayvey

Status:	Resolved	Start date:	02/10/2020
Severity:	Low	% Done:	100%
Assignee:			
Category:	Controls and UI		
Target version:	1.10.0		
Version:	1.8.1	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Breaking Ground, Core Game, Making History		

Description

Steps to replicate:

It doesn't happen all the time, but once it happens then it happens throughout the game.

1. Open Graphical Maneuver editor in the Maneuver Mode (bottom left)
2. Rapidly click on one of the prograde/retrograde/normal/antinormal/radial in/ radial out/advance/delay buttons on the graphical axis

Result:

Button will expand and grow without limit and will fully cover the screen. Other buttons on the graphical axis become unusable.

Fixes:

- restart game
- reload save file
- switch vessel

Notes:

Toggling map mode does not fix the issue.

When it happens the button animation seems less snappy compared to normal.

I have this happen on two separate systems with different save files, both windows 10 64, both steam version from around version 1.7 and up.

No mods.

History

#1 - 03/05/2020 08:25 PM - Sidney.Christian

- Status changed from New to Confirmed
- % Done changed from 0 to 10

#3 - 07/06/2020 03:14 PM - victorr

- Status changed from Confirmed to Ready to Test
- Target version set to 1.10.0
- % Done changed from 10 to 80

We've made some changes in this latest version and would like some feedback on this issue.

#4 - 08/09/2020 04:32 PM - jayvey

Have been playing a little bit and so far so good, haven't tested it a lot so will let know if it happens again, otherwise fix seems to be working. Button animation feels more direct and snappy when you click it, not laggy like before.

#5 - 08/16/2020 05:17 PM - jayvey

- Status changed from Ready to Test to Resolved
- % Done changed from 80 to 100

After playing a bit more I consider the issue to be fixed, thank you :)
