

Kerbal Space Program - Bug #24929

Vessel float above the surface after reload

02/27/2020 06:38 AM - KerbalabreK

Status:	Need More Info	Start date:	02/27/2020
Severity:	Low	% Done:	0%
Assignee:			
Category:	Physics		
Target version:			
Version:	1.9.0	Language:	English (US), 简体中文 (Chinese Simplified)
Platform:	Windows	Mod Related:	No
Expansion:	Breaking Ground, Core Game, Making History		

Description

I put a vessel on Duna. After doing unload and load back, I found that the vessel no longer stays on the surface but floating a few meters above the surface and fall. Thanks to gravity easing, no death of little Kerbals has occur 'til now, but it worth to be concerned. It never happened in previous versions. I haven't tested other planets but I think I didn't notice this issue on Mun or Minmus. P.S. it might relates to issue [#24924](#).

History

#1 - 02/27/2020 06:57 AM - KerbalabreK

- File *persistent.sfs* added

#2 - 02/28/2020 12:22 AM - KerbalabreK

- File  2020-02-27 174649.png added

- Subject changed from *[Kerbal-Unfriendly Bug] Vessel float above the surface after time-warping to [Kerbal-Unfriendly Bug] Vessel float above the surface after reload*

- Description updated

#3 - 02/28/2020 12:23 AM - KerbalabreK

- Subject changed from *[Kerbal-Unfriendly Bug] Vessel float above the surface after reload to Vessel float above the surface after reload*

#4 - 02/28/2020 03:15 AM - Anth12

Bug reports need persistent files or quick saves that havent got parts mods (preferably no mods at all)

Loading the file you supplied into the stock version of 1.9.1 deletes all the crafts that have parts added using mods, so I cant test it.
