Description

I'm doing the Science tutorial and the "Next" button is highlighted ready to press, and pressing it looks like the button gets depressed and the dialog flashes like its going to change content, but then nothing ends up changed. Forward progress cannot be made in the tutorial until the R&D facility is exited, then "Next" pressed, then the R&D facility is re-enter to follow the instructions for that one step, then exit R&D, press "Next" and re-enter facility to follow the next instructions.

Yes definitely an issue there. Good find.

Confirmed.

This isn't happening for just one step, it's happening for multiple steps.

Correction: Every step, including the ones in the archive screen.
