

Kerbal Space Program - Bug #25939

Making History - Meet me in Zero G - mission always fails after undocking with Agena

08/11/2020 11:23 AM - jj

Status:	Confirmed	Start date:	08/11/2020
Severity:	Low	% Done:	10%
Assignee:	just_jim		
Category:	Gameplay		
Target version:			
Version:	1.10.1	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Making History		

Description

What is expected.

You undock from the Agena, it explodes and the mission proceeds. You can see in this video what is expected to happen / how it used to work at some point: <https://youtu.be/-SyilRoV2ms?t=1369>

Instead the mission just fails after the Agena is destroyed.

I attached my save file.

To reproduce

1. Load the save file with the rendezvous already set up or play the mission up to this point yourself.
2. Proceed docking with the Agena.
3. Do the EVA.
4. Undock.
5. Agena explodes.
6. Mission failed.

FYI, this is a duplicate of [#25859](#).

I'd love to see this fixed, by the way. Currently playing through the missions for the first time...or trying to. :(

This bug is also present in version 1.11.1

#5 - 03/26/2021 03:27 PM - Anonymous

Really? This bug was confirmed 7 months ago and it is still present in 1.11.2. Not being able to complete mission and severity is "low"...

#6 - 03/26/2021 03:49 PM - whyd4k

- File Screenshot 2021-03-26 164348.png added

My guess is mission is failing because of condition that if Atlas Agena is destroyed, mission ends.
