Expansion:	Core Game		

Description

Hello,

It would seem that the fuel lines on the stock vessel Ariane 5 are installed backwards, as their arrows point upward toward the fairing instead of downward toward the engine. I would suggest you reverse them; it should take less than a minute with the Offset Tool and not impact anyone's saves.

Additionally, there is no "Stock Crafts" category, so I picked the closest appropriate category to present feedback on stock crafts.

History

A correction!

Only the center one should be flowing downward to the engine. The lines to the left and right flow back to the tanks.

#2 - 09/17/2020 04:12 PM - Technicalfool

- Status changed from New to Confirmed
- Assignee set to Technicalfool
- Severity changed from Low to Very Low
- Platform Linux added

Not sure whether I'd call it feedback or bug, but it's definitely a thing. Thanks for the report.
