Description

Contract titled: Test LV-1 "Ant" Liquid Fueled Engine landed at The Mun. Required test conditions are mun and landed. Both with green checks. Note indicates to use staging to initiate.

Attempted methods:

- launched multiple newly designed ships from all runways and launch pads To land on Mun before attempting
- attempted activation from both staging and part options test button
- attempted from lunar launch pad both tethered and untethered
- each attempt version also tried with a fine at 0%, 40%, and 100% thrust
