Kerbal Space Program - Bug #26715

Game freezes when loading Save Game

11/27/2020 05:03 AM - KerbalSpacefan157

Status:	New		**Start date:**	11/27/2020
Severity:	Low		**% Done:**	0%
Assignee:				
Category:	Save Files			
Target version:				
Version:	PS4 - Enhanced Edition 2020-10-14 Patch 13		**Language:**	English (US)
Platform:	PS4		**Mod Related:**	No
Expansion:	Core Game			

Description

When I tried to load my save the game froze and was unresponsive

It happened when I was going to the tracking station to view planets and moons
but all of sudden the game crashed and I couldn't get in my save or load.

It would usually reproduce when the game crashes

this bug is most likely Reproduceable In the patch 13 and older patches

https://www.youtube.com/watch?v=UKzoMfFIDcw link to bug problem

In the video it shows when I press continue the game freezes unable to do anything causing me to close the application

History

Note: I also think the reason why the game is freezing while trying to load is because the game is becoming more unstable while playing the game longer

I have 36 flights and when I was playing before this bug the fps decreased dramatically, the loading screen took longer and there's a point where the career save doesn't work anymore

I Terminated the debris which helped a bit but still kept crashing

This bug is similar to this bug https://bugs.kerbalspaceprogram.com/issues/13924 this is the windows version
