Description

When using "level up crew" in the Mobile Processing Lab only some of the crew members' experience gets recorded.

Steps to replicate:

- 1) Load the attached saved game. You are now flying a vessel "Station 1" on its way to Duna. The vessel has a Mobile Processing Lab MPL-LG-2 and four Kerbals on board.
- 2) TimeWarp 5 days forward. You have now entered Duna's sphere of influence.
- 3) Use "Level up crew" on the Mobile Processing Lab.
- 4) Go to the Astronaut Complex and look at the information for Assigned astronauts.

Expected: all four astronauts should have "Fly-by Duna" in their Log.

Observed: Bob, Kirgel, and Urgan all have "Fly-by Duna" in the log. Jebediah doesn't (see attached screenshots).

Note: This is a minimal example demonstrating the issue. I played this game a bit more, flying by Ike and then going to Duna's orbit. None of these events were logged for Jebediah either.

I don't have any mods installed. I installed the game via Steam. KSP version is 1.10.1.2939.
