<p>When building a craft in the VAB, the game crashes frequently. Cannot replicate as happens at random. When exiting the VAB and returning to the space centre, has a similar effect at random. When leaving flight mode and returning to the space centre also crashes the game. Several times the save gets corrupted.</p> <p>The game is very unreliable and near unplayable as a result.</p> <p>Same problem on PS4 and PS5.</p>
