

Kerbal Space Program - Bug #26859

Missing Text in Magnetometer Boom Feedback

12/18/2020 12:02 AM - klesh

Status:	New	Start date:	12/17/2020
Severity:	Low	% Done:	0%
Assignee:			
Category:	Controls and UI		
Target version:			
Version:	1.11.0	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Core Game		
Description			
<p>When receiving the "Cannot deploy while stowed" feedback message using any of the various antennae, the message is prefixed with "[Antenna]" so the full feedback message reads "[Antenna] Cannot deploy while stowed." See attached screenshot.</p> <p>Under such circumstances where you would receive this message using the Magnetometer Boom, the message instead reads: "[] Cannot deploy while stowed." Where there is missing text between the brackets.</p> <p>The fix would be to add magical code somewhere resulting in "[Magnetometer Boom] Cannot be deployed while stowed." to be displayed, bringing this error feedback in line with the rest.</p>

I forgot to include these with the initial report, a quick and easy way to trigger the "cannot deploy while stowed" message for confirmation.

Easy Reproduction Steps:

- 1) Make a small craft with a probe core, power, SM-6A.
- 2) Use the PAW to remove the shroud of the SM-6A.
- 3) Place Magnetometer Boom part on the inside cargo area of the SM-6A.
- 4) Launch craft, and attempt to extend the Magnetometer Boom part to receive error message with missing text.
