<b>Expansion:</b>	Core Game		

#### Description

In the Flight scene, the Mapview filter tab is hidden under the Altimeter.

There are two mods which move and hide the Altimeter, (Draggable Altimeter, Altimeter AutoHide), which then lets the Mapview filter tab to be visible. I also heard from someone that when jumping from the mapview to flight view, it shows briefly before being hidden. May be related.

To reproduce, install one of the two mods, and use it to either hide or move the altimeter in the Flight scene
