

Kerbal Space Program - Bug #26911

Leaving Part Pickup range and quicksaving/quickloading causes part to stay on screen

12/22/2020 11:23 PM - agg

Status:	Confirmed	Start date:	12/22/2020
Severity:	Low	% Done:	10%
Assignee:			
Category:	UI		
Target version:			
Version:	1.11.0	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Breaking Ground, Core Game, Making History		

Description

To Reproduce:

1. Start a new save
2. Launch a Mk-1 command pod with an EVA Science kit
3. Take the science kit out of the capsule as if to give it to Jeb
4. Walk far enough away from the capsule that the popup menu for the capsule disappears
5. Quicksave
6. Quickload

The EVA science kit is now stuck on screen, and remains there even after quitting to the main menu.

Here is a video of an earlier attempt to get the bug to happen - it takes a few tries but it eventually occurs

- Status changed from New to Confirmed

- % Done changed from 0 to 10

GOG KSP 1.11.0 (no mods, no DLCs)

Interesting bug.

Most of the time its countered by putting it back into the inventory on doing F5 or attempting to escape to the menu.

But this is one way its broken

Hope you dont mind agg. I did a quick video to back up your claim.

For QA...note how the icon should have disappeared once Jeb went out of range of the mk1 pod.

- File screenshot10.png added

And a screenshot of what happens when I F5/F9 afterwards.

It wont respond to input and is stays there until exiting KSP

(also missing from the inventory)
