

Kerbal Space Program - Bug #26915

EVA kerbal rename vessel window lets "T" key bleed through to still toggle SAS

12/23/2020 02:00 AM - Dunbaratu

Status:	New	Start date:	12/23/2020
Severity:	Low	% Done:	0%

Target version:			
Version:	1.11.0	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Making History		

Description

The screenshot shows what I mean.

When an EVA Kerbal clicks on a deployed science station (Breaking Ground DLC) and picks the "rename vessel" option it opens a dialog where you can type a new name.

While typing in that text field, the "T" key is still causing the SAS to toggle. It's not blocking that control while typing.
