Description

I deployed Grand Slam Passive Seismometer on Mun. I left mun and on way kerbin i got error messages, when i later came to look passive seismometer was removed from game.

History

#1 - 01/17/2021 06:00 PM - jukkamuhonen@hotmail.com

- Subject changed from Deployed science: impact disappeared when left alone to Deployed science: impact disappeared when left alone (Warp might make deployable science fall)

Made further investigation. This happened after warping while on surface, near deployed science. Sometimes science jumps away from ground and might fall on its side so it doesn't count as surface touch. Apparently if you leave science site at this state game decides to remove science item from game.
