

Kerbal Space Program - Bug #27186

Kerbals can no longer jump away from ladders

01/30/2021 10:22 AM - Poodmund

Status:	Confirmed	Start date:	01/30/2021
Severity:	Low	% Done:	10%
Assignee:	victorr		
Category:	EVA		
Target version:			
Version:	1.11.1	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Core Game		

Description

KSP 1.11.0 introduced a new issue wherein holding Left Shift whilst controlling a Kerbal EVA'd on a ladder makes them slide down the ladder. This causes an issue when you try to jump backwards off a ladder by holding Left Shift and pressing Space as the sliding causes the Kerbal to not release backwards off the ladder when jumping.

This mechanic was working in 1.10.1, see video: <https://www.youtube.com/watch?v=Kc1DI4m6MsU>

This is the issue that was introduced in 1.11.0 and still persists in 1.11.1: <https://www.youtube.com/watch?v=zaxzSVQHKIE>

This action (jumping back away from a ladder) is documented here in the keybindings:

https://wiki.kerbalspaceprogram.com/wiki/Key_bindings : Shift + (W/S/A/D) + Space Jump to different directions when on ladders
