With the making history DLC, you can choose the "Dessert Launch Site," when in the VAB, and the "Dessert Airfield," in the Spaceplane Hangar. I believe you meant Desert (Biome), and not Dessert (The food).

Intentionally spelt wrong ;)

#2 - 02/04/2021 06:06 AM - Dunbaratu

This was a purposeful joke, implying the Kerbals themselves did it.

Although I'd be interested to see how it looks in other languages. Did they manage to preserve the joke in Localization or did they just have to lose the joke because the pun doesn't work.

great eyes to spot it that's for sure, and thanks for taking the time to log it. It is indeed intentional as Anth and Dunbaratu noted, I'll mark this as Acknowledged
