

Kerbal Space Program - Bug #27309

Save doesn't launch

02/21/2021 08:52 PM - svpluto2

Status:	New	Start date:	02/21/2021
Severity:	Low	% Done:	0%
Assignee:			
Category:	Save Files		
Target version:			
Version:	PS4 - Enhanced Edition 2021-01-14 Patch 14	Language:	English (US)
Platform:	PS4	Mod Related:	No
Expansion:	Breaking Ground, Core Game, Making History		

Description

When selecting the saved game in the main menu, the screen freezes and the game doesn't load. This is the second in 6 months when I lost an entire career save! Lots of people have had the issue and nobody has a solution. The game is extremely unstable and hardly playable both on PS4 and PS5. So much wasted time and no fun.

Usually you get error messages on PlayStation about corrupted saves. Ps5 can restore these without a problem. This time I saved the game myself before exiting and closing the game.

Dude same here like this game is unstable Like I try to load my save but the game just freezes when you press load game

I lost about 1 year of work due to constant Bugs and glitch's And now I reported a similar bug like yours but got no response yet Link for it <https://bugs.kerbalspaceprogram.com/issues/26715> Its been 3 months...

This game is Fun but like the bugs and glitches Just make the experience worst a. I lost my years of work, I tried to find a solution but sadly I don't think there is any. At this point I gave up trying to bring it back. I'm also sorry about your career. That Work you put in like I did just gone like that without any warning. what makes things worse is trying to reproduce these kinds bug in ksp. Its a nightmare trying to do it anyways. I have this feeling where the dev Gives so Much love to Pc But Looks at console And give it nothing very special. I hope you can try getting your save back somehow And Hoping that the devs see this and at least Try to find a solution for us poor console ksp fans. Good luck
