

Kerbal Space Program - Bug #27435

SM-18 Container decouples anything radially attached to it when its staged

03/23/2021 03:28 AM - Anth12

Status:	New	Start date:	03/23/2021
Severity:	Low	% Done:	0%
Assignee:			
Category:	Parts		
Target version:			
Version:	1.11.1	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Breaking Ground, Core Game, Making History		

Description

KSP 1.4.3 (MH Only)
KSP 1.11.2 (DLCs only)

When the SM-18 stages detaches its shroud, it decouples anything attached radially

Video Evidence:

1.4.3 Shows the bug without 1.11 issues and around the time the issue started

<https://youtu.be/0KCvQBQ7R3Y>

Shows issue in 1.11.2 with a bug that seems to happen when physicsless parts are decoupled.

<https://youtu.be/sqGafWxm-z0>

Files Attached:

SM18 KSP 143.sfs made in 1.4.3

SM18 Tester.craft made in 1.4.3

Issue happens if the craft is made in 1.11.2, just giving backward compatibility to show when it started.

Thanks go to BezKartuza for showing this issue on the KSP forums and Lisias for additional input to what the cause was.
